[Title]

[Company]

[Recipient Street Address]

[Recipient City, ST Zip]

---

**Dear [Recipient Name]**

As a full-time student at Amity University, I've completed high-level courses in computer science, Data Analysis, Python, and machine learning. I believe that my technology expertise would allow me to excel in the intern position with your organization.

[Company] reputation for innovation within the software industry draws me to apply for this internship. I am confident that I can be a valuable contributor to your company for the development of software solutions based on the following achievements from my academic career:

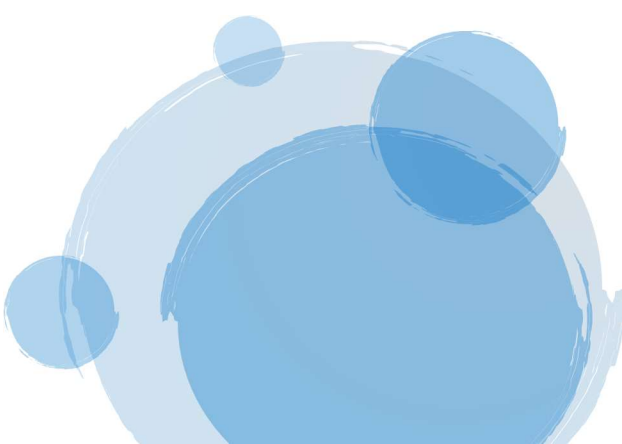

Coordinated with a diverse team of students to develop facial recognition software, which included implementing features and writing scalable code

Executed a machine learning project to predict potential stock prices for biotechnology companies during the pandemic

Currently a member of the university coding club, which included planning events and providing tutoring services to computer science and information technology students

I look forward to scheduling an interview with you to discuss further how my advanced knowledge of computer science would benefit [Company]. You may contact me via phone or email at your convenience. I appreciate your time and consideration.

Sincerely,  
Ayushi Awasthi
